

Gastroenterologist, Division of Gastroenterology

Maisonneuve-Rosemont Hospital

Montreal, Quebec, Canada

Maisonneuve-Rosemont Hospital is looking for gastroenterologists as of March 2024.

A one-year fellowship beyond the core gastroenterology training is required for a full-time position at our health center. However, we also offer temporary replacement positions for which a fellowship is not required.

Our hospital center offers a diverse practice with many days of endoscopy procedures as well as research and teaching opportunities.

If you are a physician that is committed to providing exceptional patient care and have a passion for education, we want you to join our team at HMR.

French-language proficiency (spoken and written) is a requirement for the positions. This is to ensure you have the appropriate level of language skills needed to practice as a physician in one of the largest health centers in Quebec serving a large majority-francophone community.
